

Let your employees get comfortable while your business becomes more profitable.

Linking Technology And Business Value

Improve productivity and efficiency by upgrading to one of the Samsung OfficeServ™ 7000 Series telephone systems.

Contact us today to learn how we can help you save money and work smarter.

Today's workplace is no longer defined by the building with your company logo on it. Home-based employees and road warriors are becoming commonplace these days, and your communications system has to operate where your employees are most comfortable — Everywhere.

Our OfficeServ 7000 Series telephone systems allow you to easily accommodate home, or road-officed employees by seamlessly connecting incoming calls to their remote location.

Samsung's remote IP phones allow your transient workers to handle, hold, conference, transfer or page just as if they were in the office. Our Go Green solutions for today's dynamic, cash strapped and eco-conscious businesses are able to reduce or eliminate commutes and fuel costs. Plus improve your employee's quality of life.

Because let's face it, many of today's most valuable employees prefer to do business from home.

Benefits:

- Reduce overhead costs
- Retain valuable employees, gain the ability to set and stagger their work hours
- Seamlessly page, handle, hold, place, conference or transfer calls remotely
- No reimbursement issues for company calls
- Reduces your company's carbon footprint

The mobile and home office, it's where your employees are headed and where your business needs to be. Call us to discuss how we can equip your business with Remote IP Possibilities.
